

Name: Carly 李佳宜 (14) P.5 (B)Date: 26th November, 2018Remember to write the **introduction** and the **conclusion**.

The Earth is facing many problems. People can help solve the problems. We need to care about the Earth because the Earth is facing many problems. ✓

I think there is too much rubbish, so the land is very polluted. If people go on producing too much rubbish, the land is very polluted. We should recycle old books and toys. We should not produce too much rubbish. ✓

I think the air is too polluted in ^{Hong} Hung Kong. If cars keep on producing too much black smoke, the air will be polluted. We should not cut down too many trees. We should take ^{public} pubic transport more often. ✓

I think the water is very dirty. If the factories give out too much polluted water, the sea or rivers will be dirtier so the sea animals will be sick or die. We should stop polluting the water. We should not throw rubbish into the sea. ✓

I think people waste too much energy. If people keep on wasting too much energy, the ~~E~~arth will run out of energy sources. We should not leave the lights on. We should turn off ✓

the air conditioners when we don't use it. ✓

All the people should work together to save the Earth. We should start working at this moment. If the problems of the Earth get worse, we will not have a good place to live. Save the Earth. Don't waste energy! ✓

A- Don't waste energy!
