

Name: Charles (19) P.5 (C)Date: 21st November, 2018Remember to write the introduction and the conclusion.

The Earth is facing many problems. People can help to solve the problems. We need to care about the Earth because our Earth'll run out of energy sources soon. We should work together to save the Earth.

I think the land is too messy. If people produce too much rubbish every day, it'll be hard to find places for rubbish. We shouldn't produce too much rubbish every day. We should produce less rubbish every day.

I think the air in Hong Kong is too dirty because the cars give out smoke. If cars give out too much smoke, people will be sick, animals and plants will die. We should take public transport more often. Cars shouldn't give out too much smoke.

I think the sea and ^{the} rivers in Hong Kong

are dirtier than before. ✓ If factories don't stop polluting the water, many sea animals ~~will~~ die. ✓ We shouldn't throw rubbish in the sea or rivers. ✓ Factories should stop polluting water. ✓

I think people waste too much energy. ✓ If people waste too much energy, the Earth'll run out of energy sources soon. ✓ We should save energy. ✓ We shouldn't waste too much energy. ✓

In conclusion, we can help by saving energy, recycling old things, reducing ~~less~~ rubbish and reusing something that clean and not broken. We can start working now. ✓ We'll all die ~~if~~ if the problems of the Earth get worse. ✓ Save the Earth, not to waste, we do it now!" ✓

v. good!
