

Name: Annie (22) P.5 (A)

Date: ^{second} 22 November, 2018

Remember to write the introduction and the conclusion.

The Earth is facing many ~~problems~~. People can help to solve the ~~problems~~. It is because the Earth is all ~~people's~~ home. We can save ~~energy~~.

I think people produce a lot of rubbish every day. If people produce a lot ^{of} ~~fo~~ rubbish every day, the street will be ~~dirty~~. We should put things into recycling bins.

I think the factories and cars give out too ~~much~~ smoke. If the factories and cars give out ~~too much~~ smoke, the air will be ~~dirty~~. We should not cut down ~~too~~ many trees.

I think the factories keep polluting the ~~water~~. If factories do not stop polluting the sea and the rivers, the fish will ~~die~~. We should stop polluting the ~~water~~.

I think people waste ~~energy~~. If people keep wasting energy, the Earth will run out of energy sources ~~soon~~. We should ^{not} ~~v~~ leave the lights and taps ~~on~~.

Everyone should work together to save the Earth. We can start working now. If the problems of the Earth get worse, the Earth will be a ~~dirty~~ place!
