

Name: Yang Wai Ho (23) P.5 (A)

Date: 22<sup>nd</sup> November

Remember to write the introduction and the conclusion.

The Earth is facing many ~~problems~~. People can help to solve the  
problems because the Earth is very beautiful <sup>in</sup> my eyes.

I think people throw away a lot of rubbish every day. If people  
throw away a lot of rubbish <sup>the</sup> in street, we will not have a clean place. We  
should not throw the rubbish everywhere. Good!

I think the factories and people keep polluting the water. If  
the factories or people do not stop polluting the water, the sea will be  
~~polluted~~ <sup>polluted</sup>. We should stop polluting the water.

I think people waste energy. If people keep wasting energy, the  
Earth will run out of energy sources <sup>so</sup> soon. We should turn off <sup>the</sup> computer  
and lights if you do not need them. ✓

All people should work together to save the Earth. We can  
start working <sup>now</sup>. If the problems of the Earth get worse, we  
will get sick easily.
