

Name: Yu Ying Wen (Amy) (22) P.5 (D)Date: 22th November, 2018Remember to write the introduction and the conclusion.

The Earth is facing many problems. We live on Earth so we need to care about the Earth.

I think people throw away ~~(too)~~ much rubbish on the road. If people produce too much rubbish, there will be no enough place for the rubbish. The foreigners will not like to visit Hong Kong. We should not pollute the land. Also, we should recycle plastic bottles. I think there ~~(are)~~ too many cars on the road. If the cars produce too much black smoke, the air will be dirty. We should plant more trees and flowers. Also, we should use the public transports more often.

I think the sea and the rivers are dirtier than before. If the factories do not stop polluting the sea and the rivers, the sea animals will be sick or die. We should not throw rubbish into the sea. Also, we should not pollute the water. I think the people waste ~~(too)~~ much energy. If people leave the lights and TV on when they do not need them, the earth will run out of energy sources.

We should save energy. Also, we should recycle plastic bottles, papers and cans.

The Earth is facing many problems. If the problems of the Earth get worse, we will die.
